INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1989 Volume 16, Number 1 January-February

Contents

M.-H. Chun	1	A theoretical and experimental study on solidification dynamics of a flowing fluid through a vertical cooled channel from a reservoir
N. Ashgriz and P. Givi	11	Coalescence efficiencies of fuel droplets in binary collisions
S.S. Cha and H.J. Lee	21	Correlation for blackbody radiation absorption by liquid fuel droplets
I.H. Farag and J.L. Vaillancourt	31	Heat transfer in gas turbine combustor fueled with coal-water mixture
A. Campo and C. Schuler	43	Laminar/turbulent forced convection and thermal radiation in an internal gas flow
K. Himasekhar	55	Numerical simulation of mold heat transfer of injection molded plastic parts using a modified three-dimensional boundary element method
M.A. Ebadian and H.C. Topakoglu	65	Heat conduction in a circular rod maintained under a multi-cascade wall temperature
C.Y. Liu, W.M. Ying and J.O. Tan	79	Flow in the adiabatic section of a heat pipe
G.W. Bergantz	89	Infinite Prandtl number variable viscosity free convection with suction
K. Himasekhar, P.K. Sarma and K. Janardhan	99	Laminar mixed convection from a vertical rotating cone
G. Le Palec	107	Numerical study of convective heat transfer over a rotating rough disk with uniform wall temperature
M. Kumari and G. Nath	115	Unsteady boundary layer flow on a cylinder in a channel
R.M. Saldanha da Gama	123	A model for heat transfer in rigid continuous mixtures
G. Gouesbet and J. Maquet	133	A simple model to understand over-stability in thermal lensing
S. Olek	143	Solution to a fuel-and-cladding rewetting model
A. Sluzalec	159	Thermal phenomena in conductor

INDEXED IN Current Contents, Eng. Ind. Monthly and Author Ind., Energy Res. Abstr., EDB

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1989 Volume 16, Number 2 March-April

Contents

S. Chellaiah and R. Viskanta 163 On the supercooling during freezing of water saturated porous media

A. Nakayama and I. Pop 173 Free convection over a nonisothermal body in a porous medium with viscous dissipation

K.J. Renken, D.J. Soltykiewicz and D. Poulikakos 181 A study of laminar film condensation on a vertical surface with a porous coating

A.A. Raptis and H.S. Takhar 193 Heat transfer from flow of an elastico-viscous fluid

A.R. Mansour 199 An analytical solution of laminar heat transfer to power-law non-Newtonian fluids in circular ducts

Graetz-Nusselt problem

N.A. Poirier and A.S. Mujumdar 205 Numerical solution to the Graetz problem: achieving accuracy in the entrance region

B. Sunden and S. Trollheden 215 Periodic laminar flow and heat transfer in a corrugated two-dimensional channel

Q. Xiao, R.C. Xin and W.Q. Tao 227 Analysis of fully developed laminar flow and heat transfer in asymmetric wavy channels

D.V. Krishna, D.R.V.P. Rao and G. Sarojamma 237 Mixed thermal convection in a cylinder of non-uniform gap

M. Kumari, I. Pop and G. Nath 247 Mixed convection along a vertical cone

P.S. Ghoshdastidar and A. Mukhopadhyay 257 Transient heat transfer from a straight composite fin: a numerical solution by ADI

S.C. Saxena, A.K. Verma, R. Vadivel and A.C. Saxena 267 Heat transfer from a cylindrical probe in a slurry bubble column

M.A. Ebadian and O.A. Arnas 283 Heat conduction in a slab subjected to an N-cascade wall temperature on both its surfaces

M.-H. Chun, J.-S. Baek and J.-R. Park 295 An experimental investigation of the effects of the entrance shape of sudden contraction on single and two-phase pressure drop

S. Hernandez and E. Marschall 305 The effects of varying composition on heat transfer in the critical region of binary fluid mixtures

C.-C. Li and Y.-C. Lee 315 Computational aspects of dimensional analysis

Announcement 323 Ninth International Heat Transfer Conference

Announcement 324 Short Course: Design methodology for enhanced heat transfer

INDEXED IN Current Contents, Eng. Ind. Monthly and Author Ind., Energy Res. Abstr., EDB

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1989 Volume 16, Number 3 May-June

Contents

C.C. Wang and N.S. Liao 325 Transient response of a double-pipe condenser to change of coolant flowrate

S.V. Kumar, W.J. Minkowycz and K.S. Patel 335 Thermodynamic cycle simulation of the diesel cycle: exergy as a second law analysis parameter

R.L. Frederick and A. Valencia 347 Heat transfer in a square cavity with a conducting partition on its hot wall

M.R. Duignan, G.A. Greene and T.F. Irvine, Jr. 355 Measurements of the film boiling bubble parameters on a horizontal plate

R.H. Kim 367 Experimental investigation of a cornstalk wick heat pipe

A. Yucel 379 Conductive and radiative heat transfer in cylindrical geometry without azimuthal symmetry

Z. Tan 391 Combined radiative and conductive heat transfer in two-dimensional emitting, absorbing and anisotropic scattering square media

V.V. Averin, A.S. Dmitriev and A.V. Klimenko 403 Thermal radiation of regular spherical particle structures with fluctuational thermal fluids being taken into account

A. Yucel, H. Kehtarnavaz and Y. Bayazitoglu 415 Boundary layer flow of a nongray radiating fluid

K.-S. Chang and J.-Y. Sa 427 Numerical study of the unsteady mixed convection heat transfer from a circular cylinder

R. Krishnamurthy 435 The effect of Prandtl number on the wall shear stress in vertical mixed convection flows

W.-S. Yeung 445 Analysis of natural convection in a closed vertical annulus

S.-S. Hsieh 457 Thermal correlation of turbulent flow over helically roughened surfaces in horizontal annuli

M.D. Mikhailov and P.P. Tkachenko 469 Exact symbolic solution in heat transfer

INDEXED IN Current Contents, Eng. Ind. Monthly and Author Ind., Energy Res. Abstr., EDB

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1989 Volume 16, Number 4 July-August

Contents

C. Pan and T. L. Lin 475 Marangoni flow on pool boiling near critical heat flux

G. Kocamustafaogullari and I.Y. Chen 487 Horizontal tube evaporators: Part I. Theoretically-based correlations

S.C. Cheng and C. Nguyen 501 Radiation heat transfer in dispersed droplet flow

K. Vafai and A.J. Lacalle 513 Transient ceiling jet development in large scale fires

K. Vafai and J. Ettefagh 525 An investigation of the feasibility of the use of stabilizers in a nuclear waste canister with specific emphasis on evaluation of radiative properties

H.I. You 537 Experimental determination of heat transfer coefficient between a microstructure and fluid

W.W.S. Charters and S. Theerakulpisut 547 Efficiency equations for constant thickness annular fins

A.M. Attar and D.L.R. Oliver 559 Numerical investigation of the unsteady heat transfer from a single sphere

R.M. Cotta 569 On the solution of periodic multidimensional diffusion problems

P.G. Vazquez, C.V. Caceres, M.N. Blanco and H.J. Thomas 581 Prediction of concentration profiles in alumina spheres impregnated with molybdenum solutions

P. Lasgorceix and M.A. Dudeck 593 Properties of a cylindrical reactor using an arc plasma generator

A.R. Mansour, M. Sheboul, A.M. Hussein and A. Nusayr 603 An analytical solution for diffusion and reaction in a laminar flow tubular reactor

C.-C. Li and Y.-C. Lee 609 Addendum

Announcement 609 Australasian Chemical Engineering Conference

Announcement 610 International Symposium on Gas-Liquid Two-Phase Flows

INDEXED IN Current Contents, Eng. Ind. Monthly and Author Ind., Energy Res. Abstr., EDB

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1989 Volume 16, Number 5 September-October

Contents

M.-H. Chun and H.-G. Jun 611 Filmwise reflux condensation length and transition point to the complete reflux condensation in vertical u-tubes

G. Kocamustafaogullari and I.Y. Chen 621 Horizontal tube evaporators: Part II. Experimental overall heat transfer performance

M. Sakley and G. Lambrinos 633 Sublimation de la glace sous convection forcee. Determination du coefficient global de transfert de masse

A. Campo and A. Salazar 645 The role of a single large axial interval on the numerical determination of turbulent forced convection in a tube

D.M. Maron, N. Brauner and G.F. Hewitt 655 Flow patterns in wavy thin films: numerical simulation

D.P. Sekulic 667 Flow through communicating channels compact heat transfer geometry

D. Charoensupaya and W.M. Worek 681 Dynamic sorption of porous adsorbents-comparison of experimental results with numerical predictions

A.D. Brent 693 Numerical simulation of tin solidification under the influence of natural convection in a thick walled annular crucible

M.A. Ebadian, T.C. Yih and O.A. Arnas 703 Heat conduction in an equilateral triangular rod under a step-change wall temperature

W. Shyy and P.Y. Chang 713 Transport process in a horizontal discharge lamp under microgravity

S.C. Cheng and C. Nguyen 723 Emissivity of water vapour at elevated pressures

T. Kudra, A.S. Mujumdar and G.S.V. Raghavan 731 Gas-to-particle heat transfer in two-dimensional spouted beds

C.D. Ebinuma and C.Y. Liu 743 Film condensation over a permeable nonisothermal body of arbitrary shape in a porous medium

Announcement 753 A Short Course in Multiphase Flow and Heat Transfer

INDEXED IN Current Contents, Eng. Ind. Monthly and Author Ind., Energy Res. Abstr., EDB

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1989 Volume 16, Number 6 November-December

Contents

K. Vafai and A.G. Holmes 755 Photographic evaluation of fuel injectors for spark ignition engines

F.C. Arnold 763 Temperature profiles during heated liquid injection

J. Orozco and L. Chen 773 Film boiling from a rotating sphere in forced convection

G.R. Rudemiller and J.D. Lindsay 785 Apparatus for investigating boiling phenomena in a fibrous porous medium

S.B. Sathe and T.W. Tong 795 Comparison of four insulation schemes for reduction of natural convective heat transfer in rectangular enclosures

S.-C. Shin and K.-S. Chang 803 Transient natural convection heat transfer from a horizontal circular cylinder

M.K. Jensen 811 Simultaneously developing laminar flow in an isothermal circular tube

B. Sunden 821 Analysis of conjugated laminar and turbulent forced convection-conduction heat transfer of a plate fin

A.A. Adeniji-Fashola and C.P. Chen 833 Inlet turbulence intensity level and cross-stream distribution effects on the heat transfer in plane wall jets

D. Oliver and K. DeWitt 843 Mass transfer rates from a sphere in potential flow: moderate Peclet numbers

T.W. Tong, P.S. Swathi and G.R. Cunnington, Jr. 851 Reduction of radiative heat transfer in thermal insulations by use of dielectric coated fibers

J.R. Tsai and M.N. Ozisik 861 Combined convection and radiation in participating laminar flow inside a parallel-plate duct with flux boundary conditions

N.K. Joshi, T.K. Thiagarajan and V.K. Rohatgi 875 Effect of thermal boundary layer on radiative heat transfer from combustion plasma

P.K. Sarma and T. Subrahmanyam 883 Turbulent free convection from a radiating vertical surface situated in air - a conjugate problem
